DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Oh (5,668,521).

Oh (5,668,521) discloses a detachable device or frame comprising:
an outer frame member (8) (Fig. 4) including at least one upper portion (140,200,300) and at least one lower portion (8); at least one prong (142,162) disposed on one of said at least one upper portion and said at least one lower portion; at least one prong receiving opening (9 or 200 or 300) disposed on one of said at least one upper portion and said at least one lower portion opposite said prong; an inner frame member (6) including at least one upper section and at least one lower section; at least one prong (10) disposed on one of said at least one upper section and said at least one lower section, and at least one prong receiving opening (42,42) disposed on one of said at least one upper section and said at least one lower section opposite said prong.

Re claims 2-4, Oh (5,668,521) shows at least one prong (224,228) is disposed on said lower portion of said outer frame, and at least one prong (10) is integrally formed and disposed on said upper section of said inner frame and wherein at least one prong (142,162) is integrally formed in the outer frame.

Allowable Subject Matter

3. Claim 6 is allowed.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Great Britain Patent (GB 2,185,434) shows detachable outer and inner frames (25 and 26), a handle, and shaft assembly to retrieve a waste. Simon (5,601,321) shows a litter and refuse retrieval device.
